

HOW TO WIN

Once players have made their decision, it's the dealer's turn. The dealer will receive up to 3 cards and must stop if their score is 7 or higher. If the player's score is higher than the dealer's, they win and will be paid 1 to 1 on their Play wager. If the dealer's score is higher, the player will lose their Play wager. The dealer wins all ties. The side bets will be paid or taken according to the payouts shown on the table.

The player will receive a bonus of 2 to 1 if he achieves an "Instant Win". An "Instant Win" is when both the player and the dealer have one card, the player's total score is a 9, and the dealer's total score is an 8. If the casino also allows for an "Instant Win" on a 9 vs. 7, the house edge drops by 0.6%.

SIDE BETS

There are two optional side bets available for the player, Nine Insurance and the Dealer's Hand wager. The Nine Insurance bet will win 8 to 1 if the dealer scores a 9 using two or three cards.

The Dealer's Hand side bet pays depending on the dealer's three-card hand. If the dealer has a three-card poker ranking, this side bet will be paid according to the posted pay table. If the dealer stops with one card, this side bet will automatically lose. If the dealer doesn't have a poker ranking, this side bet will lose.
