

BACCARAT

1. The Basic Game

This game is played in two versions, both with a multi-deck shoe. *Mini-baccarat* is played at a table in the pit, where the dealer plays the cards. The other version is played for higher stakes (usually \$25 minimum), in a separate room, and the players deal. In either case, the rules are the same.

To calculate the value of a baccarat hand, which will have 2 or 3 cards, treat Aces as 1, numbered cards as their value, and Tens through Kings as 0. Add the values, and ignore the tens digit. That is, a hand of 4,8 adds up to 12, for a hand value of 2. The higher hand wins.

After the players bet on *Player*, *Banker*, or *Tie*, the dealer deals two-card Player and Banker hands. Then, they complete playing the Player hand, before completing the Banker hand.

Player Hand

- If the Player has 6 to 9, or the Banker has 8 or 9, the Player stands on two cards.
- Otherwise, the Player takes a third card.

Banker Hand

- If the Banker has 0 to 2, and the Player does *not* have 8 or 9, the Banker gets a third card.
- If the Banker has 7 to 9, he stands.
- If the Banker has 3 to 6, he *may* take a third card, subject to the following rules :
 - (a) If the Player has 8 or 9, the Banker stands on 3 to 6.

- (b) If the Player has two cards, the Banker stands on 6, and takes a third card on 3 to 5.
- (c) If the Player takes a third card :

Banker Hand	Player's Third Card - Draw	Player's Third Card - Stand
3	0 to 7; 9	8
4	2 to 7	0; 1; 8; 9
5	4 to 7	0 to 3; 8; 9
6	6; 7	0 to 5; 8; 9

2. Pay-outs

- A win on the Player hand pays even money.
- A win on the Banker hand pays even money, less a *commission*, usually 4% or 5%. The dealer will keep track of the amount that you owe.
- A win on a Tie will pay 8 to 1.

3. House Percentage

- Player wins 44.623% of the time.
- Banker wins 45.862% of the time.
- There is a Tie 9.516% of the time.
- Player win has a house percentage of 1.24% (including pushes), and 1.36% when pushes are neglected.
- Banker win has a house percentage of 1.05% (including pushes), and 1.17% when pushes are neglected, using a 5% commission. With a 4% commission, these become 0.60% and 0.67% respectively, making this game one of the most favourable in the casino.
- The Tie bet has a house percentage of 14.36%.

The material included in this PDF document constitutes a 'fair use' of any copyrighted material as provided for in Section 107 of the U.S. Copyright law which allows for education, teaching (including multiple copies for classroom use), scholarship, or research and is not deemed an infringement of copyright in the eyes of the law.

§ 107 . Limitations on exclusive rights: Fair use⁴⁰

Notwithstanding the provisions of sections 106 and 106A, the fair use of a copyrighted work, including such use by reproduction in copies or phonorecords or by any other means specified by that section, for purposes such as criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research, is not an infringement of copyright. In determining whether the use made of a work in any particular case is a fair use the factors to be considered shall include—

- (1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
- (2) the nature of the copyrighted work;
- (3) the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
- (4) the effect of the use upon the potential market for or value of the copyrighted work.

The fact that a work is unpublished shall not itself bar a finding of fair use if such finding is made upon consideration of all the above factors.
